HISTORY OF THE FOUNDATION

Howard & Nancy Terry pose with Terry Scholars at the 2006 Winedale Picnic.

“Success is the attainment of the goals you’ve set for yourself in life.” –Howard L. Terry

The Terry Foundation’s goal is to improve and develop the State of Texas by assisting Texas students to attend the state’s finest public universities. The Foundation hopes that these students will have a significant impact on the future leadership of the state and nation. To achieve this goal, the Foundation awards scholarships to students who meet the high standards set by the Founders.

What began in 1986 as a small scholarship program is now the state’s largest private source of scholarships for the University of Texas at Austin, Texas A&M University, the University of Houston, Texas State University, the University of Texas at San Antonio, the University of Texas at Dallas, the University of North Texas, Texas Tech University, Texas Woman’s University, Texas A&M-Galveston University and Sam Houston State University, with over 1,300 Terry Scholars enrolled. But its origin was neither large nor legendary – it was as humble and low-profile as the Founders whose name it bears.

The Terry Scholarship Program was born of a desire of Howard and Nancy Terry to help young people to help themselves. A longtime resident of Houston, Howard Terry had been active for many years in banking, construction, real estate and oil and gas. With profound business success over the decades and their family’s needs met, the Terrys developed a growing desire to give back to the community and, specifically,

to help young people to reach their goals in higher education. In 1986, the Terrys began considering a variety of options in their desire to make a lasting contribution to the future of Texas higher education.

After evaluating ideas as varied as university campus construction projects and endowed-chair faculty positions, the Terrys were still not satisfied. Knowing that universities are more than buildings and classrooms, Howard Terry had repeatedly declined to allow the universities to honor his previous contributions by placing his name on campus structures: “Mortar and bricks will eventually be torn down,” he reasoned. The Terrys believed, in the long term, that a university – like the state it represents – is only as good as the educated citizens it produces. Thus was born a desire to invest in the students who would attend the public colleges and universities in Texas.

The Terrys’ desire to help young people was influenced greatly by Howard Terry’s own college experience: he had attended the University of Texas on an athletic scholarship, becoming captain of the football team and graduating in 1938. His family origins in Cameron, Texas were modest and it was only through the generosity of others that his college education had been made possible. Mr. Terry never forgot the helping hand that he had received in attending college and was determined to extend that same help to a new generation of students.

After seeking counsel from sources that included former UT-Austin coach Darrell Royal (an original Foundation Board Member) and Houston attorney Rhett Campbell (Board

At one of the earliest picnics, Mr. Terry addressed all of the scholars – without a microphone.

Member since inception and now Board Chair), the Terrys determined that their most lasting contribution would be through a perpetual endowment that would provide college scholarships for students who had demonstrated the capacity to become outstanding future leaders and who needed financial assistance to achieve their goals in higher education. From this simple concept, the Terry Foundation was created in 1986 to be the source of a perpetual scholarship program. The first scholarship recipients, known since then as “Terry Scholars,” were selected at interviews held in the summer of 1987. That original class of seventeen 1987 Scholars was joined in the 1988-1989 academic year by seventeen additional recipients. Over the years, the number of Scholars selected has increased, with the most recent spring 2014 interviews having resulted in the selection of 312 new freshmen Scholars.

During the first seventeen years of the Foundation’s history, Scholars attended only the University of Texas at Austin or Texas A&M University. In the fall of 2004, the Foundation Scholarship Program expanded for the first time, when Terry Scholars were named at the University of Houston and at Texas State University. Additional growth provided scholarships in 2006 at the University of Texas at Dallas and the University of Texas at San Antonio, again in 2010 at the University of North Texas in Denton and in 2011 at Texas Tech University in Lubbock, in 2013 at Texas Woman’s University in Denton, and most recently in 2014 at Texas A&M-Galveston and Sam Houston State University in Huntsville. Strategic future plans call for the program’s ultimate expansion to other public universities in Texas.

Continued growth in the Foundation endowment made possible additional program expansion in 2013 when the Board approved a new component to the program: scholarships for students transferring completed college hours to any of the participating Terry universities. The Terry Transfer Program commenced in June, 2013 with the selection of 158 Terry Transfer Scholars, launching the largest program in the state specifically designed to assist transfer students. In 2014, Foundation interviews resulted in the selection of 193 additional Transfer Scholars. These transfer recipients will join the 2014 Terry freshmen and upper-class Scholars to number 1,316 Terry Scholars enrolled for the 2014-2015 academic year.

Since its inception, the Terry Scholarship Program has assisted over 3,700 Texas college students to achieve their goals in higher education. The Foundation Board oversees a large endowment and now includes six members who are Terry Scholar Alumni. The program was honored in 2010 by the National Association of Scholarship Providers in being named National Scholarship Provider of the Year. Chartered to exist into perpetuity, the Foundation is designed to continue in the future to add scholarships each year.

Founders Howard and Nancy Terry with the Terry Scholars, Directors, staff, Alumni and special guests. 2007 Winedale Picnic.

Howard Terry was active in the management of the Foundation up until the very end of his long life when he died in 2012 at age 95. The Foundation lost its second Founder later that same year, when Nancy Terry passed away at the age of 85.

The Terry Foundation has become larger than the Terrys ever imagined, fulfilling in the process their dreams of making a difference in the lives of students across the state. Despite his extraordinary success in ventures that made the Terry Foundation possible, Howard Terry observed that “the Terry Foundation is the most important thing I’ve done in my life, because it’s enabled me to help more people than I would have ever been able to help otherwise.”

THE TERRY SCHOLARSHIP PROGRAM

Advisory Board Member Brian Carroll (UT-Austin 1994), Director Brian Yarbrough (UT-Austin 1988), Cameron Crump (UT-Austin 2010); Jessica Difucci (TAMU 2010), Advisory Board Member Kerry Keiser Ugarte (UT-Austin 1988), and Denise Burell Richter (Texas State 2006). 2014 Austin Traditional Interviews.

Criteria

The Terry Foundation awards Traditional scholarships for entering freshmen to Texas high school seniors who have been accepted for admission to the University of Texas at Austin, Texas A&M University at College Station, the University of Houston, Texas State University, the University of Texas at San Antonio, the University of Texas at Dallas, the University of North Texas in Denton, Texas Tech University in Lubbock, Texas Woman's University, Texas A&M-Galveston, or Sam Houston State University. The Transfer Scholarship is available at most participating Terry universities for Texas residents transferring completed college hours and meeting other requirements. To be selected to receive a Traditional or Transfer scholarship, potential Terry Scholars must demonstrate academic excellence, leadership and financial need.

Terry Scholars are distinguished by a deep-rooted desire to enrich the general welfare of the community and an established record of leadership. In order to select Scholars with the greatest potential for success, the Foundation's selection committees focus on candidates with a demonstrated history of involvement in activities, outstanding scholastic achievement and a well-rounded personality marked by a desire to succeed.

Nominations for Terry Scholarship awards are accepted only from the designated offices at the eleven universities affiliated with the Foundation. Nominations are not accepted from any other source.

The Selection Process

Each spring, the universities nominate candidates that will matriculate the next fall. In selecting nominations, the universities adhere to the criteria established by the Foundation. Interviews are conducted by the Foundation each year in April and July for the Traditional and Transfer programs, respectively. The new class of Terry Scholars are announced after this intensive two-step selection process.

While the numbers of nominations and subsequent scholarships have grown substantially since the first scholarships were awarded in 1987, the process to win a scholarship has remained highly competitive. In selecting finalists, the selection committees at the affiliated universities are limited to a small fraction of the thousands of applications received.

The Foundation administration invites the finalists to formal interviews conducted each spring concurrently in Austin, Houston, Dallas and San Antonio. Finalists meet with a six-member panel consisting of members of the Foundation Board of Directors, Alumni Scholars and current Terry Scholars. The interview panels make the final selections and new Scholars are notified prior to the start of the following academic year.

In 2014, thirty-two interview panels met with a total of 1,019 finalists for the combined Traditional and Transfer scholarship interviews. Of those finalists, 505 were selected for Terry Scholarship Awards.

The Stipend

The amount of the Traditional Freshman stipend is based on the cost of attendance at the universities, including tuition, fees, books, on-campus room and board and miscellaneous expenses. The actual specific amount of the stipend will vary for each Scholar, depending on other scholarship awards and the ability of the Scholar's family to contribute to the cost of college. The average amount of the stipends for the Traditional Program increases each year due to increases in cost-of-living and expenses. The Traditional stipend is renewable for eight semesters, or, for some programs, up to ten semesters.

The Transfer stipend is a fixed amount per year – valued at \$12,500 in 2014-2015 – and is renewable for up to six semesters.

Initially, a Terry scholarship is awarded for two semesters of college and is renewed annually at the discretion of the Board of Directors. In order to continue as a Terry Scholar, a student must maintain a cumulative GPA of 2.5, meet the

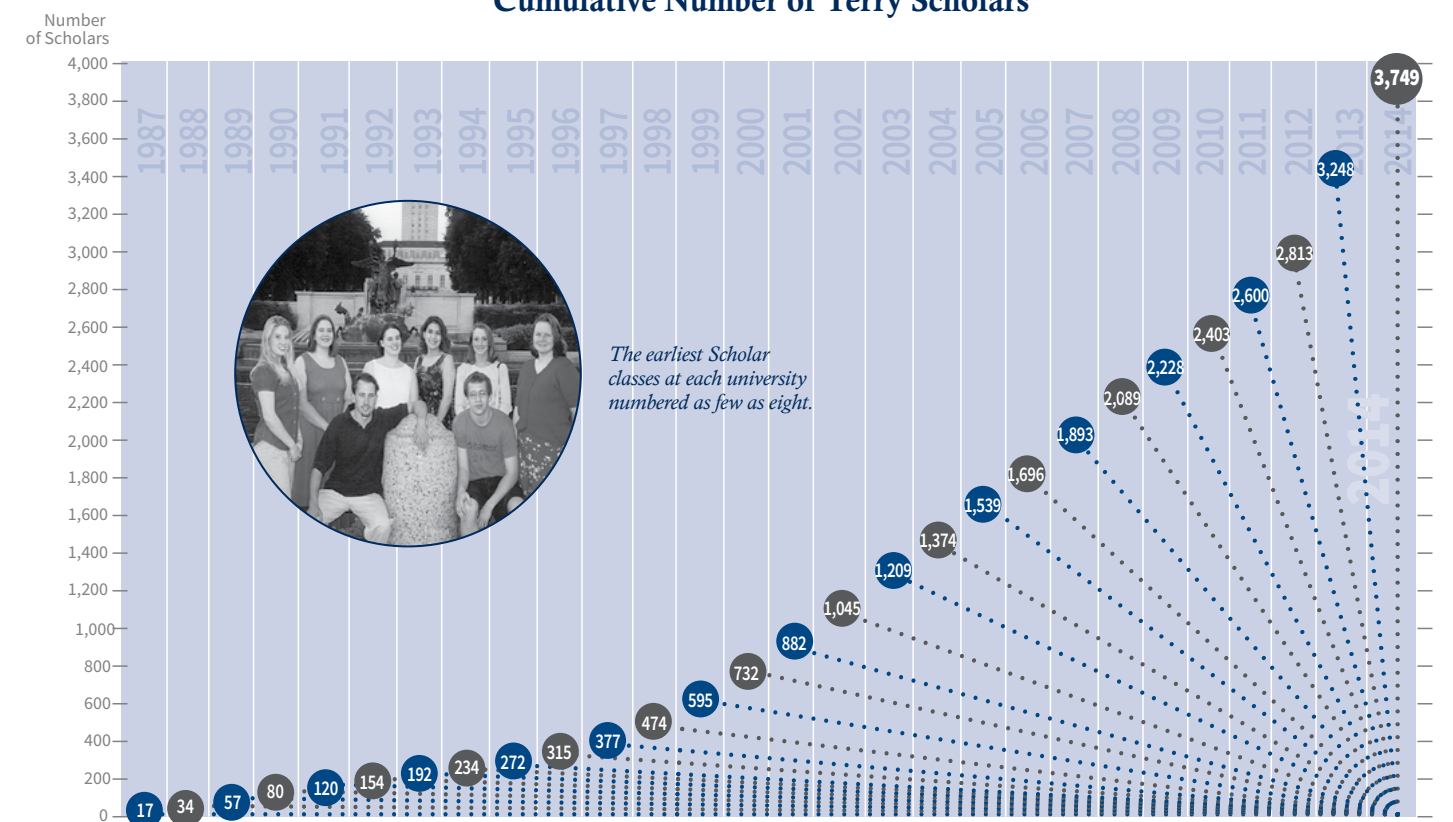

requirements for mandatory attendance at specific Terry Foundation events and fulfill other reporting requirements.

The Terry Foundation seeks to provide adequate financial support for each Terry Scholar so that students may concentrate on academics and college-related activities, without having to incur debt to finance their education. In addition, the Scholarship Program is designed to limit or eliminate the need for Scholars to work during the college years.

Funding

The Terry Scholarship Program is funded by the earnings of a substantial endowment that has been provided solely by the Founders and is managed by the Terry Foundation. The Foundation is chartered to exist into perpetuity and anticipates additional growth based on incremental endowment by the Founders and their estates.

Cumulative Number of Terry Scholars

Alyssa Nakamura, Cat Gibbs, D'Ann Holubec, TTU Associate Director of Student Financial Aid and Scholarships Helen Carter, Justin Miller, Jack Clark, Kleg Kennedy, and Amanda Flores. 2013 TTU Banquet.

Campus Orientations

Terry Scholars at each of the nine universities gathered on campus in Houston, Austin, College Station, San Marcos, San Antonio, Dallas, Denton, and Lubbock for the Foundation's annual orientation programs. These events were held in late summer, just prior to the start of the fall 2013 semester. For new Scholars, the orientation is designed to focus special emphasis on the challenges faced by first-year and transferring college students. The day's events included presentations on the Foundation Scholarship Program by Foundation executive

management and staff. The Scholars also met with members of college administration and with invited guest speakers in the fields of time management and study skills. In addition, both the freshmen and transfer Scholars met with representatives of the on-campus Terry Scholar organizations to discuss upcoming campus events, including service and social activities with their fellow Scholars. At the conclusion of the orientation programs, the new Scholars enjoyed an informal dinner and networking with the continuing upper-class Scholars, who offered mentoring to the new Scholars and tips for a successful first year at the university.

Officers Ellen Stein, Abbie Herberger, Kelly Keyser, Blane Stiles, Camilla Smith, Macy Reynolds and Mallory Miner welcome freshmen Scholars. 2013 UNT Orientation.

Kevin Conway, Jonathan Lwowski, and Josh Kuehne conduct an ice breaker for freshmen. 2013 UT-San Antonio Orientation.

Fall Banquets

During October of 2013, Scholars at each of the nine universities were hosted by the Foundation at the annual fall dinners. Members of the Foundation Board of Directors and staff joined the Scholars and university guests in elegant settings for the banquets, held on the campuses in Dallas, San Marcos, Austin, Houston, College Station, San Antonio, Denton, and Lubbock. Scholars enjoyed dinner and networking with the Foundation Directors, Scholar Alumni, fellow Scholars, and representatives of the university administration on each campus. The dinner programs included remarks from student leaders of the Terry Student Organizations on each campus, and from a guest speaker who had been selected and invited by the Scholars.

Ishita Alam, Ashley Price, Mahaley Millican, Christine DeOcampo, and Sarah Gerken. 2013 TWU Banquet.

Ethan Springer, Lawton Lander, Sierra Martin, William Harvey, Edmundo Pineda, Cecille Sorio, Hayden Lander, and Colton Hagler. 2013 TAMU Banquet.

Monica Ramon and Noel Fuller (Texas State 2008). 2013 Texas State Banquet.

Aide Meza and Nicola Shatleh present senior speeches at the 2013 UH Banquet.

2013 Alumni Luncheon

Dallas-area alumni gathered in October for the ninth annual Terry Scholar Alumni Luncheon. Following a tradition of rotating the event to various parts of the state, the 2013 Luncheon returned to Dallas following gatherings in Houston in 2011 and Austin in 2012. Alumni Scholars from the North Texas area were hosted by the Foundation at Maggiano's Little

Italy, in Plano, where 70 graduates of the scholarship program enjoyed a reunion with members of the Terry Foundation Board and staff, and former college classmates and recent Scholar Alumni in the Dallas area. Foundation Executive Director Yvonne Rode Moody (TAMU 1987) presented a short update on the Foundation's current operations and highlights of future plans, which include additional Scholar Alumni events.

Nicole Nelson Lewis (UT-Austin 1991), Director Brian Yarbrough (UT-Austin 1988), Advisory Board Member Joseph Dowd (TAMU 1995), and Matthew Wilson (TAMU 1992). 2013 Alumni Luncheon.

Advisory Board member Chad Pinson (UT-Austin 1992) and Patrick Foster (UTD 2009). 2013 Alumni Luncheon.

Chadd Pinson (UT-Austin 1992), Nellson Burns (TAMU 1993), Brian Carroll (UT-Austin 1994), Bob Gabriel (UT-Austin 1994), Wes Migura (TAMU 1988), Kathy Davis Duggan (UT-Austin 1987), Jessica Scott (TAMU 1993), Lucy Fuhrmann Krahl, (TAMU 1988), Director Brian Yarbrough (UT-Austin 1988), Amanda Carlson Donohoe (UT-Austin 1987), Susie Buck Hawthorne (UT-Austin 1997), Hollie Shirey (TAMU 1998), Pat Kinder (UT-Austin 1990), Charles Cliff (UTD 2006), Michael Reynolds (TXST 2004), Joseph Dowd (TAMU 1995), Executive Director Yvonne Rode Moody (TAMU 1987). 2013 Advisory Board Meeting.

2014 Interviews

The Foundation set a new record with the Spring 2014 interview season. In April, twenty interview panels selected a record 312 new 2014 Traditional Freshman Scholars. Just two months later, in June, twelve interview panels convened to select 193 Transfer Scholars, bringing the combined total to 505 entering Terry Scholars for fall 2014. The finalists came from every area of Texas to interviews held concurrently in Austin, Houston, Dallas, and San Antonio. Members of the

Board of Directors were assisted by 171 Scholar Alumni and current Scholars who served on the selection panels. Over the course of the sixteen days of interviews, the thirty-two panels interviewed a total of 1,019 finalists nominated by the eleven universities. The Foundation Board of Directors extends special thanks to those Scholars and Alumni Scholars who assisted on the selection panels, with particular appreciation to Advisory Board members and Scholar Alumni, who, along with members of the Board of Directors, served as panel chairs.

Brian Mueller (TAMU 2004), Madhura Kulkarni (UT-Austin 2001), Foundation Chair Rhett Campbell, Meyling Ly (TAMU 1999), and Franco Martinez (UH 2005). 2014 Dallas Transfer Interviews.

The Spring Picnics

The Foundation celebrated the end of the 2013-2014 academic year with spring picnics for Terry Scholars from all participating universities. Scholars from UT-Austin, Texas A&M, University of Houston, UT-San Antonio, and Texas State universities gathered at Winedale Historical Center on the last Sunday in April. One week later, Scholars from UT-Dallas, University of North Texas, and Texas Tech University and Texas Women's University gathered for the third annual

Picnic North on the UT-Dallas campus, in Richardson. Scholars at each location were joined by Foundation Directors and staff, Alumni Scholars and their families, and special guests from the universities. Catered lunch was followed by presentation of gifts from the graduating senior Scholars. Following tradition, each senior took the microphone to speak briefly of their future plans and then, as a group, honored the Foundation Directors with gifts from each school's class of upcoming graduates.

Edgar Rivera and Nicola Shatleh. 2014 Winedale Picnic.

TAMU senior Rikki Buckalew. 2014 Winedale Picnic.

Foundation Chair Rhett Campbell, President Ed Cotham, Executive Director Yvonne Moody and Director JD Davis (UT-Austin 1989) accept a gift from TWU Scholar KeriAnne Jones. 2014 Picnic North.

Ezequiel Calderon and fellow UT-Austin officers present the senior gift. 2014 Winedale Picnic.

TTU Director of the Terry Scholar Program Heather Medley places the Terry cord on senior Erin Warren.

UTD Scholars Candace Galbreath and Kwen Williams. 2014 Picnic North.

Ben Telaneus, Sydney Robertson and Noah Thacher. 2014 Winedale Picnic.

Statewide Service Project

In April, UH Scholars hosted fellow Terrys from eight universities for the 2014 Statewide Service Project. Following a late night of socializing on the UH campus, Scholars headed to Galveston Island early the next morning for a spirited beach cleanup effort. The Foundation sends its appreciation to all participating Terrys for a successful event!

Statewide Officer Retreat

The 2014 Terry Statewide Officer Retreat was hosted by the UT-Austin officers in January. Student officers from each of the nine campus organizations gathered on the UT campus for a weekend of bonding and collaboration on ideas for community service projects.

Texas State University Team Building

Texas State Terry Scholars packed the 2013-14 year with bonding activities and community service projects. Below are snapshots from several events, which included: Walk to End Alzheimer's, Mentor/Mentee Speed Dating, Adopt-A-Spot, Terry Intramural Flag Football, Bobcat Build, and For the Kids Dance Marathon.

University of Houston TAP Night

In March, seven Terry Alumni volunteered their time and expertise for the 2014 UH TAP Night. Intended as an opportunity for current scholars to gain post-graduate career insight from Terry Alumni in their field, UH Scholars have made TAP Night a regular addition to their annual event agenda. Much appreciation from the Foundation and UH Scholars for the March TAP Night volunteers: Pamela Ayala (UH 2009), Christen Egge (UH 2007), Shannon Harrison Wooten (UH 2007), Melissa Hernandez (UH 2008), Sam Keen (TAMU 1998), Leah Matthews (UH 2007), and Nour Shatleh (UH 2006).

Texas A&M University is the flagship of the Texas A&M University System and one of only 62 invited members of the prestigious Association of American Universities.

It is one of a select few universities with triple federal mandates to provide land-grant, sea-grant and space-grant service to the nation. With more than 58,000 students (53,000 on main campus) and a physical campus of more than 5,200 acres, Texas A&M may be large, but it still retains its friendly environment – with “Howdy!” being the unofficial greeting.

As the state’s first public institution of higher learning, Texas A&M has strategically grown into one of the nation’s most comprehensive universities, offering more than 200 distinct undergraduate and graduate degree programs as well as professional degrees in law, veterinary medicine, medicine, dentistry, nursing, pharmacy and public health. With a current student body of more than 58,000, it ranks among the nation’s five largest universities, with students from every state and approximately 125 countries.

Texas A&M operates a marine-oriented branch campus in Galveston and an engineering-oriented branch campus in the Persian Gulf state of Qatar (fully funded by Qatar Foundation for Education, Science and Community Development). It also operates a center in Costa Rica and facilities in Italy and Mexico for study-abroad and other educational opportunities as well as for research and service-learning endeavors.

Texas A&M’s faculty-led research has yielded more than \$800 million in annual research expenditures and involves hundreds of faculty engaged in an array of projects that range from fundamental studies to major discoveries, innovative multidisciplinary solutions and technology commercialization, many of which have had a major impact on people’s lives. As one of the benefits of attending a tier one research university, Texas A&M undergraduates are encouraged to participate in research projects with faculty and research scholars, which doesn’t happen in all universities. Undergrads and graduate students have opportunities to engage in a wide variety of scholarly research projects, publications and discoveries. Researchers at the university are finding creative solutions across disciplines to the challenges facing the state, nation and world.

Although Texas A&M’s student body is one of the nation’s largest, its student-to-faculty ratio is approximately 20:1. Average SAT scores are considerably higher than the national average and the university ranks among the nation’s leaders in enrolling National Merit Scholars. Also, the university enrolls about 5,000 international students representing approximately 125 countries, and more than 3,000 students participate in study-abroad programs in more than 80 countries each year. Texas A&M historically has led the state in student retention and graduation rates overall, as well as for African-American and Hispanic students. More than a quarter of all entering freshmen are the first in their families to attend college. To help reach these students and others who might not otherwise be considering a college education, Texas A&M operates eight Prospective Student Centers in key locations across the state.

Leadership development outside the classroom is an important part of the Texas A&M experience. More than 75 percent of Aggies belong to at least one of the university’s 950-plus student-led clubs and organizations. One of the endeavors that makes Texas A&M unique is Fish Camp, the largest freshman extended-orientation program in the nation, with upperclassmen donating their time to provide incoming freshmen the opportunity to gain valuable insight into what to expect during their college careers and, in many cases, make lifelong friends. Another is The Big Event, the largest one-day, student-run service project in the nation which began at Texas A&M and is the model for 75 other schools across the country.

Although military training has not been mandatory at Texas A&M since 1963, between 2,000 and 2,400 young men and women choose to participate in the university’s Corps of Cadets each year. The corps consistently commissions more military officers than any institution in the nation except the service academies, but students also choose to be in the corps strictly for its leadership development opportunities and its legendary camaraderie.

An unprecedented amount of campus construction is under way or has been recently completed. Within the past two years the Agriculture and Life Sciences Building and the Performance Arts and Humanities Building opened, as well as the renovated and expanded Memorial Student Center. A new underpass to connect east and west campuses has been a great success, and the \$450 million expansion of Kyle Field, which will bring its capacity to 102,500, is at midpoint construction and will be completed by 2015.

College Station campus is virtually in the center of the Houston–Dallas/Fort Worth–Austin/San Antonio triangle and within 200 miles of 24 million of the state’s 26 million citizens. The university is the home for the George Bush Presidential Library and Museum, which annually attracts thousands of visitors from throughout the nation and brings an array of nationally and internationally prominent speakers to the campus for the benefit of the university’s students, faculty, staff and the surrounding community.

The Texas A&M Foundation, which is located on campus, manages a \$5 billion endowment – fourth among U.S. public institutions and 10th overall – for the benefit of Texas A&M’s academic and related programs. Also located on campus is the headquarters for The Association of Former Students, the university’s alumni organization that serves close to 400,000 former students through a network of about 330 chartered alumni clubs worldwide. The Association, through its giving program, provides more than \$3 million annually for student scholarships and financial aid, faculty enrichment and other campus-based programs.

At Texas A&M, our purpose is developing leaders of character committed to learning for a lifetime and dedicated to serving the greater good.

Scholars showcase the 2014 Statewide Service Project t-shirt.

Texas State University is an emerging research university located in the burgeoning Austin–San Antonio corridor, where it is the largest campus in the Texas State University System and one of the largest in the state.

Texas State's 34,229 students choose from nearly 200 undergraduate, master's and Ph.D. degree programs offered by the following colleges: Applied Arts, the McCoy College of Business Administration, Education, Fine Arts and Communication, Health Professions, Liberal Arts, Science and Engineering, the University College and the Graduate College.

Authorized by the Texas Legislature in 1899, Southwest Texas State Normal School opened its doors in 1903. Over the years the Legislature broadened the institution's scope and changed its name, in succession, to Normal College, Teachers College, College, University, Texas State University-San Marcos and, in 2013, Texas State University. Each name reflects the

university's growth from a small teacher preparation institution to a major, multipurpose university. Texas State's original mission was to prepare Texas public school teachers, especially those of South Central Texas. It became renowned for carrying out this mission, but today it does far more.

As the university's student population has grown – from 303 in 1903 to more than 34,000 in 2012 – the campus, too, has expanded. The original 11-acre main campus has grown to 429 acres, plus an additional 4,200 off-site acres in ranching, farming and a recreational camp. Major acquisitions include the 79-acre San Marcos Baptist Academy campus in 1978, the 90-acre Aquarena Springs Resort in 1994, the 125-acre University Camp on the Blanco River in 1951, and the 3,485-acre Freeman Ranch in 1985.

Located at the heart of campus, "Old Main" has long been the symbol of Texas State University. Located on the edge of the Texas Hill Country where blackland prairies turn into beautiful hills, Texas State enjoys a setting that is unique among Texas universities. The beauty of the crystal clear San Marcos River

and the stately cypress and pecan trees on the campus add to the charm of its picturesque setting. The campus is in San Marcos, a community about halfway between Austin and San Antonio. Its location on the banks of the San Marcos River provides recreational and leisure activities for students throughout the year.

Texas State is nationally recognized for excellence in many academic disciplines. The Geography Department has been ranked the largest and one of the best programs in the nation for many years by the American Association of Geographers. Faculty members in geography, communication studies, business, mathematics and mass communication have been recognized as the best in the nation in their fields. Twenty faculty members have been honored as Piper Professors, an annual recognition of the top college faculty in the state.

Student teams in debate, advertising, and free enterprise routinely place high in national competitions. The Students in Free Enterprise (SIFE) team won the international competition in 2000 against 700 teams from 15 countries and has placed among the top 20 for eight straight years. The American Advertising Federation student team claimed its second national title win in 2005.

Texas State students in jazz, marching and concert band, symphony, choirs, instrumental ensembles, mariachi and steel drum band maintain schedules of performances across the state and the world. The jazz program has been featured for years at the Montreux (Switzerland) Jazz Festival. The sound recording technology program, housed at Texas State's unique Fire Station Studio, is the only degree program of its kind in the Southwest.

With a diverse campus community including more than 28 percent of the student body from ethnic minorities, Texas State is classified as a Hispanic Serving Institution and is one of the top 13 producers of Hispanic baccalaureate graduates in the nation. Texas State also operates a campus in Round Rock, offering several programs in the greater north Austin area. Texas

State opened the St. David's School of Nursing at the Round Rock campus in the fall of 2010.

The university has granted well over 100,000 degrees over the years. Alumni include Lyndon B. Johnson, Class of 1930, making Texas State the only Texas institution – and one of only 29 colleges nationwide – to have graduated an American president. Texas State Alumni have become leaders in business, education, entertainment, media, literature, the military, law enforcement, government, agriculture, technology, science, sports, law and health care.

There is no better time to be at Texas Tech University. With a strong 90-year history of providing the best education in a wide range of disciplines, Texas Tech is poised to become the nation's next great research university.

The university boasts record enrollment with more than 32,000 students and recently obtained the highest annual research expenditures (\$140 million) in school history. Academic excellence is visible in an internationally acclaimed faculty, which excels in teaching, research and service.

Texas Tech has one of the finest and most diverse faculties in the nation. In 2013, nine faculty members, the most in school history, were awarded grants from the Fulbright U.S. Scholar Program. The university recently welcomed two National Academy members to the Whitacre College of Engineering. Texas Tech's Phi Beta Kappa chapter, which

in 2008-09 received the highest rating from the national Phi Beta Kappa Society, further demonstrates the university's academic excellence.

Texas Tech is the largest comprehensive higher education institution in the western two-thirds of the state and serves a region larger than 46 of the nation's 50 states. A major research university with a friendly, humble atmosphere, students enjoy one-on-one interactions with top faculty in a safe, traditional campus environment.

The university offers more than 150 areas of undergraduate, graduate and doctoral studies. As part of the Texas Tech University System, Texas Tech shares the same campus with its sister university, the Texas Tech University Health Sciences Center. Texas Tech is the only institution in the state with undergraduate, graduate, law and medical schools all on the same campus.

A strong art and music program is balanced with growing research in a number of sustainable energy areas and other disciplines. Texas Tech researchers also are known for their

work in personal financial planning, autism education, creative and technical writing, food safety, environmental toxicology, petroleum engineering and wind science.

Texas Tech students come from nearly every county in Texas, almost every state in the Union and more than 100 countries. Students may study at the university's campus in Seville, Spain, and participate in programs in more than 80 countries. Students often win national academic championships in chess, animal sciences, debate and law.

Community engagement plays an important role at Texas Tech. In 2006, the university was one of the first institutions in the country to earn the Carnegie Foundation's classification for Community Engagement. The university has been named to the President's Higher Education Honor Roll by the Corporation for National and Community Service in four of the last six years, including most recently in 2013. Texas Tech will host the 14th Annual Engagement Scholarship Consortium (ESC). The ESC is a non-profit educational organization of higher education member institutions and a mix of state-public and private institutions that collaboratively work to build strong university community partnerships.

Texas Tech is home to the Lubbock Lake Landmark, an internationally known archaeological site; the Museum of Texas Tech University, which is accredited by the American Association of Museums; Texas Tech University Press; the Maedgen Theatre, home to Texas Tech University's Department of Theatre and Dance productions; and the Moody Planetarium.

The university is located in Lubbock, Texas, a thriving city of more than 230,000 people who help make up the economic and medical center of a 26-county region that spans from the Texas South Plains to Eastern New Mexico. Agriculture remains a big economic sector for the region with cotton production topping millions of bales annually.

Lubbock has a rich quality of life with varied music and cultural venues. The Lubbock Symphony Orchestra recently celebrated its 50th anniversary. Ballet Lubbock and the Lubbock Chorale also thrive in the city along with an annual Arts Festival that brings visitors from across the region. The Underwood Center for the Arts and numerous small galleries and community theatre groups anchor a strong arts and theatre scene.

From its beginning in 1901 as an industrial college, to its current position as the nation's largest university primarily for women, Texas Woman's University has expanded both in size and scope.

Enrollment was opened to men in 1972. The campus has grown from a single building (now known as Old Main on the Denton campus) to include health sciences centers in Dallas and Houston. An e-learning campus offers innovative online degree programs in business, education, general studies and more.

TWU prepares women and men for leadership and service through quality undergraduate, graduate and professional programs in the liberal arts, nursing, health sciences, business, the sciences and education. The university's 15,000 students "Learn by Doing" – the TWU motto – whether they're working side by side with a professor on a research project or presenting that research at international and national conferences.

TWU is among the nation's most diverse universities, with more than half of its students representing ethnic minorities. In fact, *U.S. News & World Report* ranks TWU

in the top three in the state and the top 10 nationally among universities with the most diverse student populations.

TWU students learn to be global citizens with the knowledge, skills and abilities to excel in living and working in a diverse and complex society. TWU's study abroad program at Harlaxton College in England offers a strong blend of quality academic programs and cultural opportunities. TWU faculty also provide a global classroom through study in other countries. Through these faculty-led study tours, students gain an international perspective on world issues and an appreciation for the history and culture of other nations.

Travel abroad also is a feature of the TWU Honors Scholar and Touchstone Honors programs, which combine a challenging academic curriculum with cultural and social opportunities. TWU honors students have won fellowships from Phi Kappa Phi and have been selected for prestigious national and state internships, including NASA, the Texas Senate, the MD Anderson Cancer Center and more.

TWU students in the arts also have made their mark on the world and national stages. Drama students have taken their original productions to Ireland and to the Edinburgh

and Brighton Fringe festivals in Scotland; dance students have performed in the American College Dance Festival; the TWU Concert Choir has performed at the National Women's Festival Chorus in New York City's Lincoln Center; and visual arts students have exhibited their work throughout the country.

TWU's main campus in Denton is a "home away from home" for more than 1,800 students. Located just 40 miles north of the vibrant Dallas-Fort Worth Metroplex, Denton has a style all its own. The city's historic Courthouse on the Square and live music scene have helped Denton earn the title of "Best College Town" from the 2014 Official Best of Texas.

Recent additions to the Denton campus include a new Fitness and Recreation Center and the Ann Stuart Science Complex. The fitness center received the 2013 Outstanding Sports Facilities Award from the National Intramural and Recreational Sports Association for its building design and services that enhance the overall student experience.

The Ann Stuart Science Complex, named in honor of TWU's first chancellor and 10th president (1999-2014),

doubled the university's science lab and classroom space. The facility features the latest instructional technology and state-of-the-art equipment for teaching and research in biology, molecular biology, physics and "green" chemistry. The building's fully automated greenhouse – not common in a university setting – supports cutting-edge research into the role of plants in the prevention of cancer.

The university's new TeachLivE™ Lab – the first in the state – provides TWU teacher candidates the opportunity to practice their skills in a virtual environment before moving into an actual classroom.

In addition to the main campus in Denton, TWU has health sciences centers in Dallas and Houston. Junior- and senior-level undergraduate nursing courses and graduate programs with a health-care focus are taught in dynamic medical settings that provide students with opportunities to gain professional experience.

The TWU T. Boone Pickens Institute of Health Sciences-Dallas Center, located in the heart of the Southwestern Medical District, houses the Houston J. and Florence A. Doswell College of Nursing, the renowned TWU Stroke Center-Dallas and the university's physical therapy, occupational therapy and health systems management programs.

The TWU Institute of Health Sciences-Houston Center is located within the prestigious Texas Medical Center. The center houses TWU's Nelda C. Stark College of Nursing and Executive MBA, health care administration, nutrition and food sciences, and occupational and physical therapy programs.

Excellence has been a hallmark of Texas Woman's University from its beginning. More than 100,000 graduates—most of whom remain in Texas – have taken that commitment to excellence into the hospitals, classrooms, laboratories and executive offices where they serve as nurses, teachers, counselors, artists, scientists, business leaders and more.

A commitment to excellence requires a forward motion, and TWU continually builds upon its legacy of providing new opportunities for students in fields that benefit the citizens of Texas, the nation and the world.

THE UNIVERSITY OF HOUSTON

The University of Houston is a Carnegie-designated Tier One public research university recognized by *The Princeton Review* as one of the nation's best colleges for undergraduate education. One of the nation's most ethnically diverse research universities, UH has been an integral part of the Houston community for more than 80 years.

More than 40,000 students attend UH's 12 academic colleges and the multidisciplinary Honors College. The university offers more than 200 undergraduate majors and minors, and several pre-professional programs leading to careers in medicine, law, pharmacy, energy and more. UH also offers comprehensive programs leading to teacher certification, two seven-year B.S./M.D. dual-degree programs through a partnership with The University of Texas Health Science Center at Houston and The University of Texas Medical Branch at Galveston, and the nation's only subsea engineering master's degree program.

Students learn from faculty members who hold the Nobel Peace Prize, the Pulitzer Prize, Tony Awards, the National Medal of Science and numerous national and international awards for their work in the arts, humanities, sciences, engineering, business, law and social work.

Faculty members conduct more than \$100 million in research in such vital areas as superconductivity, space commercialization, biomedical engineering, economics, biological sciences, education and energy exploration. Faculty members and students conduct world-class research through more than 30 research centers and institutes, and in every academic department.

Building on Houston's position as the energy industry capital of the world and home of the Texas Medical Center, the world's largest and most prestigious medical center, UH Energy and UH Health are two of the university's most ambitious research initiatives. In late 2009, the University made one of its most important physical expansions with the acquisition of the former Schlumberger global headquarters. The 74-acre complex is now home to the UH Energy Research Park, which houses academic and energy-related research programs, administrative operations and third-party tenants with connections to the university. The Energy Research Park is an integral step in becoming the world's foremost energy university.

The university's research facilities also include the Science and Engineering Research Center and Classroom Complex and the new Health and Biomedical Sciences Center. These facilities provide space for clinical and educational programs, and groundbreaking collaborative research projects among the many interdisciplinary health and biomedical sciences and engineering research programs that encompass UH Health. UH has also been a member of the Texas Medical Center since 2009 and is part of several health research partnerships with other TMC institutions.

The UH Law Center has been cited as one of the "best values" in legal education today. The Law Center is the leading law school in the nation's fifth-largest legal market, and its curriculum is among the broadest offered in the Southwest. Its Institute for Intellectual Property and Information Law and its Health Law and Policy Institute are both nationally ranked by *U.S. News & World Report*.

Outstanding academic programs mark every area of study at UH: the Graduate Program in Creative Writing in the Department of English is one of the leading cultural institutions in Texas and the Southwest. The program offers poets, fiction writers and non-fiction writers intensive training in both creative writing and literary studies. The Conrad N. Hilton College of Hotel and Restaurant Management is the only program of its kind in Texas. The Hilton College is consistently rated in the top hospitality programs in the world. The College of Education has more American Education Research Association

fellows than any other in Texas, and it is one of only 14 education colleges nationwide with a graduate education online program on the *U.S. News & World Report* Honor Roll. Students in the Gerald D. Hines College of Architecture routinely win national and international competitions. The Cullen College of Engineering is nationally and internationally recognized for its research efforts and degree programs that respond to the growing needs of Houston's global energy community, the nation and the world. Additionally, the Cullen College of Engineering is one of only 10 engineering schools in the nation on the *U.S. News & World Report's* Short List for most international students.

The College of Liberal Arts and Sciences educates tomorrow's creative artists and performers, economists, historians, journalists, linguists, literary critics, political scientists, psychologists and philosophers. CLASS provides all UH graduates with communication and research skills, cultural awareness and the capacity for sound ethical and aesthetic judgments.

Blaffer Art Museum, which underwent a renovation in 2012, is recognized for its innovative, cutting-edge exhibitions. In addition to hosting artists' works, the museum commissions work and organizes exhibitions that tour nationally. All of its programs and exhibitions are free and open to the public.

The UH Moores School of Music houses many award-winning student musicians and performance groups. The Concert Chorale has consistently garnered awards in some of the most prestigious choir competitions around the world.

More than 3,000 companies recruit Bauer College of Business students each year. In recent years, Bauer's Wolff Center for Entrepreneurship has become the leading program of its kind. Since 2007, *The Princeton Review* and *Entrepreneur* magazine have included the Wolff Center in the top three on their list of the Top 25 Undergraduate Entrepreneurship Programs in the U.S., listing it as No. 1 in 2008, 2010 and 2011. Bauer's undergraduate program also ranks first in Texas for total minority degrees awarded.

The College of Pharmacy has partnered with the U.S. Food and Drug Administration in a cooperative effort unique in the nation, where students are helping to develop and exchange scientific resources and educational opportunities. Pharmacy is among several UH colleges and programs listed among the top 10 professional degrees and academic programs awarding degrees to Hispanics. Others include: Optometry, Architecture, the School of Communication, and business and marketing programs. The University as a whole was designated as a Hispanic-Serving Institution by the U.S. Department of Education Office of Postsecondary Education, one of only three Tier One public research universities in the nation with this designation and the only such institute in Texas.

The University's 667-acre campus abounds with parks, fountains, plazas, sculptures, trees and recreational fields, offering all the amenities and high-tech facilities required by modern university life. As part of the campus master plan, UH is adding more residence halls and amenities as it transforms to a residential campus. Cougar Village, UH's newest residential complex, and its counterpart Cougar Village Phase II, which opened in fall 2013, add a combined total of more than 2,300 new beds for freshman and sophomore residents and

amenities such as free Wi-Fi service, floor lounges and a large exterior courtyard that creates a gathering place for campus-wide events and recreation. In 2013, UH also completed Cougar Place, a sophomore housing project that houses 800 student beds with common living and learning spaces to provide support for an enhanced academic experience. UH also offers Cougar Lofts, loft-style living that provides the convenience of being on campus with the style of city living at its best.

UH's newest dining hall, Cougar Woods, combines great food with state-of-the-art, energy efficient architecture. The building's unique design maximizes the use of natural light, and it includes high-efficiency HVAC equipment and plumbing fixtures to conserve as much water and energy as possible. Cougar Woods is home of Real Food on Campus, which hosts several delicious entrée stations, including a grill, a salad bar and deli. The Fresh Food Company, which operates in Moody Towers, is focused on meals being freshly prepared upon request and in front of customers.

Among the \$1 billion dollars of construction currently under way at UH is a spectacular addition and transformation of the University Center. When fully completed in early 2015, the UC will house a new 450-seat theater, a central kitchen and food court, the relocated bookstore and a new plaza for public student events and concerts – strengthening its role as the center of student activity, services and recreation on campus. UH's Welcome Center offers a multitude of services ranging from admissions to financial aid. The Campus Wellness and Recreation Center, one of the nation's largest and most advanced facilities of its kind, is recognized by the National Intramural-Sports Association as one of the most outstanding sports centers in the nation.

UH recently began construction of a new, state-of-the-art football stadium, opening in August 2014. When it opens in 2014, it will house 40,000 seats with room to grow, a wide variety of seating, a giant new video board and a spectacular view of the downtown Houston skyline. The stadium marks a new era in UH's world-class athletics program as it joined the American Athletic Conference in 2013. During its storied history, UH Athletics has garnered 79 team and individual national championships, and 66 Olympian athletes and coaches earning a collective 39 medals.

Complementing the campus offerings is the UH Distance Education program that provides educational opportunities to students in outlying areas. UH is the largest university distance education program in Texas. In 2013, UH joined nine other universities to explore using massive open online course (MOOC) technology and content to improve completion, quality and access to higher education for millions of prospective and current students.

The University of Houston generates \$3.5 billion annually in regional economic impact. Up to 80 percent of UH graduates remain in the Houston area. UH is a great university that a great city deserves. It strives to create enlightened leaders at the forefront of today's dynamic, global community. Just as the city of Houston prospers in the energy industry, health care fields and the arts and humanities, this university works diligently to reflect and reinforce these successes. We are partners in progress as the University of Houston travels toward overall excellence.

THE UNIVERSITY OF NORTH TEXAS

Since 1890, the University of North Texas has been a catalyst for transformation for its students and the North Texas region.

As the nation's 24th largest public university, UNT is dedicated to providing an excellent educational experience to its 36,000 students while fueling the intellectual, economic and cultural progress of one of the largest, most dynamic regions in the United States. A student-focused public research university, UNT's 12 colleges and schools offer 98 bachelor's, 82 master's and 36 doctoral degree programs, many nationally and internationally recognized. As Dallas-Fort Worth's largest, most comprehensive university, UNT is growing as a national leader in education, research and scholarship, student support and community engagement – the pillars of a great public research university. UNT's ultimate mission is to give a green light to greatness by helping its students, region, state and nation excel.

Known for offering top quality at the best value, the University is continually listed by *The Princeton Review* as a "Best in the West" college and has been named one of America's 100 Best College Buys® for 18 consecutive years.

As a major public research university dedicated to excellence in teaching and research, UNT is seeking to take its place among the premier universities in the nation with high-quality students, faculty and programs. In Fall 2013, UNT enrolled one of its largest and most academically talented freshman classes, with average SAT scores much higher than the state and national averages. It also enrolled its largest doctoral class to date. UNT also has the largest Honors College in the Dallas-Fort Worth area and its Texas Academy of Mathematics and Science program is one of only five residential programs in the nation where students simultaneously complete their first two years of college while earning their high school courses. UNT leads Texas universities in the number of students selected as Goldwater Scholars in math, science and engineering, and has standouts in the prestigious math and science-oriented Intel and Siemens competitions.

UNT enrolls students from all walks of life – from students who are the first in their family to earn a degree to those who transfer to the University to complete their educational journey. And UNT is one of the most diverse public universities in the nation with 6,800 Hispanic students and 4,800 African American students. The University's community also includes about 2,500 international students who come from every corner of the world. UNT students hone their worldviews through a global-minded education steeped in an appreciation of other cultures and study abroad.

UNT's faculty are widely known as experts in their fields and are dedicated mentors. They include National Academy members and have earned National Science Foundation CAREER awards, Ralph E. Powe Junior Faculty Enhancement awards, the Presidential Early Career Award for Scientists and Engineers, Thomson Reuters Highly Cited Researchers appointments, National Medal

of Arts honors and Texas Institute of Letters appointments, among other honors. Since becoming the first university to offer a jazz studies program in the nation, UNT has become one of the top universities for music. UNT is also a leader in the arts and arts education. And because of its diverse degree offerings, the university is home to one of the largest colleges of business in the nation. With fast-growing, innovative programs in engineering and science and nationally ranked programs in public administration, art, rehabilitation counseling, library and information sciences, and more, UNT is the kind of place that makes room for artists, engineers, teachers and everyone in between while offering a high-quality education.

With an education fueled by academic rigor, strong support and hands-on experience, 8,400 UNT graduates last year turned their knowledge into action. They join the 361,000 UNT alumni who already are transforming the world.

Students at the University of Texas at Austin encounter a world of ideas, opportunities and challenges on a campus built upon 125 years of tradition and excellence.

The university enrolls about 50,000 students – including about 39,000 undergraduates – from richly varied ethnic and geographic backgrounds – students united in their pursuit of excellence in higher education.

Recognized for its accomplishments in research, teaching, and public service, the university is the flagship of the 15-campus University of Texas System. On a main campus that houses more than 140 buildings on more than 410 acres, students have access to academic centers and programs, archives, museums, and libraries filled with treasures that bring the world to life. Students gaze upon paintings and sculptures in the Blanton Museum (the largest university art museum in the country); thumb through original manuscripts and collections from world-renowned authors, artists, and entertainers at the Harry

Ransom Center; relive the turbulent 1960s at the Lyndon B. Johnson Library and Museum; and study prehistoric fossils at the Texas Memorial Museum.

The university's culture of innovation and its position as the hub of the creative community of Austin drive a focus on new ideas, multidisciplinary research and bold innovations. Undergraduate students, including freshmen, are given opportunities to participate in cutting-edge research that results in discoveries that impact people all over the world. One of the advantages of attending a university with such a depth and breadth of resources is the choice from more than 100 majors in 13 undergraduate colleges and schools. The university also maintains research centers across the state that place its faculty and students at the forefront of study in such areas as nanotechnology, robotics, geophysics, astronomy, marine science, business, communication, nursing, history, literature, social sciences, and engineering.

The University of Texas at Austin is composed of 4,203 faculty members supported by approximately 550 assistant instructors and teaching assistants. They include three

Pulitzer Prize winners (for History in 1967 and 2006 and for Journalism in 1989); 2002 and 2008 Wolf Prize recipients; the 1991, 2000, and 2012 National Medal of Science recipients; two recipients of the 2007 National Medal of Technology and Innovation; a recipient of the 2007 A.M. Turing Award; a 2008 and two 2009 Howard Hughes Medical Institute (HHMI) investigators; and the winner of the 1979 Nobel Prize in Physics. The university has 1,287 endowed academic positions – 343 chairs, 533 professorships, 18 visiting professorships, 125 lectureships, and 268 fellowships. From the efforts of individual faculty members to the work of 100 organized research units, scholarly inquiry covers a broad range of disciplines, spanning the known universe from the inner workings of atomic nuclei to the far reaches of space.

Every day Texas Exes (alumni of the university) make a difference in their communities as volunteers, teachers, journalists, artists, engineers, scientists, business leaders and lawyers. With world-renowned faculty, top-rated academic programs, successful alumni and such an enticing location, it's no surprise that the University of Texas at Austin ranks among the best universities in the world.

2009 UNIVERSITY OF TEXAS AT AUSTIN

Adriana Elizondo
Brownsville, TX
Porter High School
Major: Accounting

Christopher M. Patino
Fort Worth, TX
Lake Worth High School
Major: Aerospace Engineering

Nathan Tipsword and Pooja Kapoor. 2014 Picnic North.

Andres F. Perez
Houston, TX

As a young, agile and rapidly growing university, The University of Texas at Dallas attracts an extraordinary combination of student and faculty resources to the vibrant, dynamic and globally connected Dallas-Fort Worth area.

Ranked by Kiplinger's as one of the top 100 best values among public universities, UT Dallas' relatively brief existence (44 years) has been committed to the pursuit of excellence and the steadfast determination to maintain the highest standards of quality.

Students seeking the close-knit community of a small university and the reputation and resources of a big one find the perfect balance at UT Dallas. With an enrollment of more than 19,000, UT Dallas offers all the benefits of a small campus: excellent student-faculty ratios and a diverse yet intimate community where every student has a voice. However, UT Dallas is also backed by the powerful UT System and is strategically aligned with other institutions

to offer advanced research and other exciting opportunities traditionally found at larger institutions.

UT Dallas' research in a variety of fields, especially in engineering and the biomedical sciences, has gained national attention. Special support is available to undergraduates who wish to conduct their own research, much of which is carried out in UT Dallas' specialized research centers. Among these are:

- The Cybersecurity and Emergency Preparedness Institute, which works to address issues of homeland security, emergency and disaster response, and cybercrime.
- The Callier Center for Communication Disorders, which provides state-of-the-art diagnostics and treatment for hearing, speech and language disorders. Its graduate program in audiology is ranked fourth in the nation by *U.S. News & World Report*.
- The Alan G. MacDiarmid NanoTech Institute is at the forefront of understanding and exploiting the nanoscale, with such discoveries as hydrogen-powered artificial muscles that are one hundred times stronger than human muscles.

Excellence in research is only logical for UT Dallas, which originated as a science and engineering research facility before it became a university in 1969. These roots have fostered a

culture that values innovation and advancement, embraces change and encourages multidisciplinary study. A prime example of this legacy is the University's Natural Science and Engineering Research Laboratory, designed to be one of the most revolutionary research facilities in the nation. The four-story, 192,000-square-foot laboratory supports interdisciplinary collaborations in fields as diverse as chemistry, biology, physics, electrical engineering and materials science.

Beyond the laboratory, the UT Dallas Naveen Jindal School of Management was ranked 37th among the nation's top business schools by *U.S. News & World Report* in 2012. *U.S. News* also included the school's full-time MBA program in 12th place among public universities. The School of Arts and Humanities' arts and technology program merges fine arts and computer science, and was included in *The Princeton Review's* list of top 10 graduate programs for video game design in 2011. These excellent and wide-ranging academic programs have attracted outstanding faculty, including a Nobel laureate and members of the National Academy of Sciences and the National Academy of Engineering, and are a magnet for the state's top students. UT Dallas' entering freshman class also has one of the highest average SAT scores among public universities in Texas.

UT Dallas is not limited by adherence to tradition, and its students are not bound by pre-set academic paths or narrow silos of study. They are free to customize their degree plans or choose from an array of multidisciplinary programs. Many students choose UT Dallas based on its academic excellence and grow to love the way they become an integral part of a lively intellectual and social community.

Spacious apartment-style housing is located conveniently on campus, and in fall 2009 the campus completed its first 148,000-square-foot residence hall. The first hall was so popular that a second, identical structure was built adjacent to the original hall. A third hall is currently under construction. The residence halls include Living Learning Communities, garden courtyards, large communal spaces and a variety of leisure, sports and recreational areas.

A unique institution of extraordinary quality and excellence, The University of Texas at Dallas has set new standards for creative innovation in Texas universities, and, with the same enthusiasm and energy that so distinctively marked its past, the University faces a brighter and even more exciting future.

THE UNIVERSITY OF TEXAS AT SAN ANTONIO

The University of Texas at San Antonio is the third-largest academic institution in the prestigious University of Texas System. Located in the seventh-largest city in the nation and second-largest city in Texas, the university has become the regional center for higher education, reflected in more than 50 percent growth in enrollment over the last decade.

Created by the Texas Legislature in 1969, UTSA enrolled its first students in 1973. In its short history, the university has grown to enrollment of nearly 29,000 students and three campuses: the Main Campus in northwest San Antonio with more than 30 buildings for teaching, research and student life on 725 acres; the Downtown Campus with four buildings on 18 acres; and the HemisFair Park Campus, home of the Institute of Texan Cultures, a museum with 45,000 square feet of exhibit space and five re-creation Texas frontier structures.

UTSA serves more students than any other higher education institution in South Texas, offering more than 150 degree programs in nine colleges: College of Architecture, College of Business, College of Education and Human Development, College of Engineering, College of Liberal and Fine Arts, College of Public Policy, College of Sciences, University College and Honors College. Master's and doctoral degree programs are coordinated through the Graduate School with 13 percent of UTSA students enrolled in graduate programs.

As the region's largest generator of engineers, artists, business professionals, teachers, scientists and technology managers, UTSA has produced more than 100,000 alumni since awarding its first degrees in August 1974.

The university's campuses provide access to opportunity for numerous historically underserved students. More than 60 percent of UTSA's students come from groups underrepresented in higher education, and many are the first in their families to attend a college or university.

Outside of the classroom, students can choose from nearly 300 student organizations. The UTSA Recreation Center

boasts the tallest indoor rock-climbing wall at a Texas college. The university also offers students on-campus housing and an expanded University Center.

In 2008, the University of Texas Board of Regents granted the university permission to expand athletics with the addition of an NCAA Division I football program. In 2009, the university hired Larry Coker, who led the University of Miami to a national championship in 2001, as the Roadrunners founding head football coach. UTSA played its first football game in the Alamodome on September 3, 2011, with record-breaking NCAA opening-game attendance of 56,743 and record-breaking average home-game attendance of 35,521. UTSA accepted an invitation to join Conference USA (C-USA), and the Roadrunners officially became members in July 2013. UTSA's NCAA Division I program has a winning legacy of nearly 60 conference championships since its inception in 1981.

As an emerging research university, UTSA is committed to providing affordable, accessible higher education to the people of Texas and beyond. Balancing excellence with access is an imperative embraced by the university community as both a goal and a responsibility.

The university's growth in student population has been matched by outstanding additions to faculty and to the number of endowed chairs and professorships. UTSA employs 1,441 faculty members with 53 endowed positions, each funded at \$1 million or more.

The university has had 80 Fulbright scholars and 98 percent of the tenured and tenure-track faculty have doctorates or terminal degrees in their fields. The UTSA faculty is among the best in the nation and includes research leaders in the fields of health, cybersecurity, energy and sustainability, and human and social development.

Increasingly, UTSA is recognized as a leader in higher education and research. Research and sponsored program funds totaled nearly \$73 million in fiscal year 2013. UTSA's research activities are propelled by strong partnerships with hundreds of educational institutions, governments and organizations across the city, the nation and abroad.

UTSA research is as diverse as its students. The university receives grants from federal, state and local agencies as well as private foundations, supporting a wide range of research projects, public service work and training programs.

The university continues to make great strides in its five areas of research strength: health, energy, security, sustainability, and human and social development. To that end, the university partners with a variety of local research organizations such as the UT Health Science Center San Antonio, Southwest Research Institute, Texas Biomedical Research Institute, the military, the government and local utilities. The university also maintains research collaborations across the nation and abroad.

UTSA is committed to enabling technology-based economic development in South Texas. The university is part of a technology commercialization ecosystem that includes pure, applied and translational research, intellectual property creation and licensing, and company formation, funding, education, staffing and incubation.

The University of Texas at San Antonio is committed to becoming a top-tier national research university, providing access to educational excellence and preparing citizen leaders for the global environment.

Laura Bright and fellow Texas State officers present the senior gift. 2014 Winedale Picnic.

Senior Angelek Marler gives a farewell hug to former UT-Austin Terry Scholar Coordinator Leslie Davis. 2014 Winedale Picnic.

Founders Howard L. Terry and Nancy M. Terry

Howard L. Terry, a native Texan, was born in Milam County in 1916. He attended the University of Texas at Austin on an athletic scholarship and earned his B.B.A. in 1938. He was employed by Procter & Gamble until 1942, when he entered the U.S. Navy and served as a P.T. Boat commander in the Pacific during World War II. He later returned to Procter & Gamble, from which he was recruited to set up a chain of appliance stores, serving as General Manager until 1951. At that time, Mr. Terry went into business for himself in lumber, building, and development, building several residential subdivisions in Texas and other states.

Over the following years, Mr. Terry founded several businesses in various fields, including Business Funds, Marathon Manufacturing, Crutcher Resources, Allied Bancshares, and Farm & Home Savings. Beginning in 1979, he became a director and chairman of the executive committee of Penn Central Corp., a position he held until 1986. In 1981, he founded the Terry Companies, a multi-state corporation involved in oil & gas exploration and development.

Howard Terry's long and successful life came to an end in 2012 at age 95. In keeping with his own prediction, he maintained regular office hours and was active in the management of the Foundation until the very end of his life. His life was celebrated at a memorial service in Houston attended by a crowd estimated at 1,000.

Despite his series of remarkable successes in business endeavors in many fields, Howard Terry often referred to the Terry Foundation as his finest achievement. The impact of his generosity and vision will be felt by young Texans and their families for generations to come.

Nancy Terry is a native of New York State, born in Ogdensburg on the St. Lawrence River. She attended the School of Nursing at the University of Rochester, New York, where her hobbies included snow skiing, ice skating, swimming and antique collecting.

She subsequently relocated to Texas and for over forty-five years was married to

Howard L. Terry, with whom she founded the Terry Foundation in 1986.

Mrs. Terry died not long after her husband, later in 2012. She will be fondly remembered for her engaging personality and quick wit, and sincere and heart-felt interest in all of the Scholars over the years.

Foundation Directors

Rhett G. Campbell, *Chairman of the Board of Directors*

Rhett Campbell served as one of the original trustees of the Terry Foundation and worked closely with Howard and Nancy Terry in the creation, management and direction of the Foundation since its inception in 1986. He has served as Chairman of Board of Directors since 2000.

Rhett is currently Counsel with the law firm of Thompson & Knight, LLP in Houston, where his areas of specialization include civil trial and business bankruptcy. He was a founding member in 1977 of the Houston law firm of Morris & Campbell, P.C., where he practiced until 2001. He holds both a B.A. in economics, magna cum laude, and Juris Doctor degree cum laude, from Southern Methodist University. At SMU Law School, he was a Hatton Sumners Scholar, a member of the Order of the Coif, and the Order of Barristers.

Rhett is married to Houston native Susie Seybold. They have three children, two grandchildren, and reside in Houston.

Edward T. Cotham Jr., *President*

Ed Cotham serves as President of the Terry Foundation, where he manages the Foundation endowment portfolio and serves as chief operating officer of the Foundation. In 1993, he was named President of Terry Petroleum Company. Prior to joining Terry Petroleum, Ed practiced law with the Morris & Campbell law firm in Houston.

Ed holds an undergraduate degree in Economics from the University of Houston and a master's degree in Economics from the University of Chicago. A native Texan, Ed returned to complete a law degree from the University of Texas at Austin.

Ed is a nationally recognized expert on Civil War history and has authored three books on military history. He and his wife, Candy, have one son and reside in Houston.

John W. Storms

John Storms has served on the Foundation Board of Directors since its inception in 1986. John is the Managing General Partner of Storms & Critz, Certified Public Accountants, of Houston. John also serves on the boards of other business entities and is an active member of the board of Child Advocates, Inc. of Houston.

John is a Certified Public Accountant and holds a B.B.A. from the University of Texas at Austin and an M.B.A. in taxation from the City University of New York.

John and his wife, Charlene, reside in Houston and have two daughters and five grandchildren.

Carter Overton

Carter Overton has served on the Foundation Board of Directors since its inception in 1986. Carter is the President of Overton Energy, LLC, a Houston-based management and investment company engaged in direct investment in US oil and gas exploration and production. He worked previously for Terry Petroleum Company, where he served as Vice President of Operations. Carter is a past Chairman of the Texas Business Hall of Fame Foundation and is actively involved in his community and the River Oaks Baptist Church.

A native Houstonian, Carter received both his B.B.A. and his M.B.A. from the University of Texas at Austin.

Carter and his wife, Elaine, reside in Houston, and have six children.

Yvonne Rode Moody

Yvonne Rode Moody was named as the Foundation's first Executive Director in August of 2012. Originally, she was selected as one of the first 17 Terry Scholars as part of the inaugural class in 1987. She joined the Foundation Board of Directors in 2000, one of the first Alumni Scholars to be named to the Board.

A native of Fredericksburg, Yvonne received a B.S. in Mechanical Engineering from Texas A&M in 1991. Her professional experience includes working for Chevron as a Retail Construction Project Manager. Her volunteer interests include a variety of church, school and civic organizations, but her passion has always remained with the Terry Foundation and its growing number of Terry Scholars and Alumni.

Yvonne and her husband, Ted, live in Houston, with their two daughters, Amber and Ashley.

J.D. Davis

J.D. Davis, FSA, was named to the Foundation Board of Directors in 2000. He is the Managing Principal for the Southern U.S. Employee Benefits Practice of Milliman, where he is also an actuary and retirement consultant.

A native of Quitman, Texas, J.D. became a Terry Scholar in 1989. He graduated from the University of Texas at Austin in 1993, where he received a B.A. in Economics (with highest honors). He also holds a master's degree from Southern Methodist University.

J.D. is also the author of a best-selling biography of Southern musicians and first cousins Jerry Lee Lewis, Reverend Jimmy Swaggart, and Mickey Gilley. He lives with his three daughters in Sunnyvale, Texas.

Jeffrey C. Stichler

Jeff Stichler is a Principal in the Conroe ISD. He was named to the Foundation Board in 2006, one of two new Scholar Alumni members named to the Board that year.

A native of Fort Stockton, Texas, Jeff was named a Terry Scholar at Texas A&M in 1990, where he graduated in 1995 with a B.S. in Kinesiology and a minor in History. He holds a Masters of Education degree from Sam Houston State University and a Doctorate of Educational Leadership from the University of Houston.

Prior to becoming a school administrator, Jeff taught advanced mathematics and coached for 11 years, seven years of which were at Conroe's Caney Creek High School, where he was named Teacher of the Year and District Swim Coach of the Year.

Jeff lives in Conroe with his wife, Melanie, and their two children.

Gayle Stinson

Gayle Stinson was named to the Foundation Board in 2006, one of two new Scholar Alumni members named to the Board that year.

Gayle is Superintendent of Schools for the Lake Dallas ISD in North Texas. She served for seven years in administration for the Texarkana School District, where her outstanding tenure as principal of Texas High School resulted in her selection as Principal of the Year by the Texas Association of Secondary School Principals.

A native of Redwater, Gayle was one of the first Terry Scholars at the University of Texas, a member of the original class of 1987. She completed her B.S. in 1991 and subsequently earned an M.S. in Education from Texas A&M at Texarkana and a Doctor of Education in 2013 from Lamar University.

Gayle and her husband, Trent, reside in the North Texas area and are the parents of three children.

Brian Garrett Yarbrough

Brian Garrett Yarbrough is a member of the 1988 class of Terry Scholars and joined the Terry Foundation Board in 2012. Brian is a partner with the law firm Erben & Yarbrough in Austin where he is engaged in legislative and regulatory advocacy before Texas government and state administrative agencies.

Brian is a 1997 graduate of the University of Texas School of Law, a 1992 graduate of The University of Texas at Austin (PLAN II Honors Program) and a 1988 graduate of Canyon High School in New Braunfels.

He is married to Wendy Wagner Yarbrough, from San Antonio. They have three children, Garrett, Wyatt and Lily. They are active members of Covenant Presbyterian Church, Rodeo Austin, and other local civic and charitable activities.

Elizabeth Riley Keeler

Elizabeth Riley Keeler is a 1992 Terry Scholar. She was named to the Foundation Board in 2012.

Elizabeth is a native Houstonian. She attended Texas A&M University where she graduated with a BS in Nutritional Science in 1996. She went on to attend medical school at the University of Texas in Houston. She completed her residency in Obstetrics and Gynecology in 2005 and joined the faculty at MD Anderson Cancer Center.

Elizabeth's practice specializes in caring for women with malignancies.

Elizabeth married a fellow Aggie, John Keeler, in 1998 and, together with their five children, they reside in Houston. She is an active volunteer at the children's schools and at the Houston Pregnancy Help Centers. She credits the Terry Scholarship for opening the door of opportunity to a happy life.

Foundation Staff

The Foundation staff includes (back) Laura Sanders, Brandy Skillern, Nancy Miller, Becky Adams, Holly VanHouten; (front) Scholarship Program Director Jodie Koszegi, Executive Director Yvonne Moody, Vice President of Administration Robert Parker, and Jamie Thyssen.

Foundation Advisory Board

In 2008, the Board of Directors approved the formation of the Terry Foundation Advisory Board. Recognized by the Board for their professional achievements and commitment to the Foundation, a group of thirty-two outstanding Scholar Alumni were selected to assist the Board in an advisory role and at Foundation events throughout the year. In 2013, the Foundation augmented the original Advisory Board with an additional twenty members, to include recent graduates and representation from a majority of universities in the Terry program.

The original Foundation Advisory Board at the 2009 Austin Alumni Luncheon.
